

**problem report number: 1**

Reported by: Dave Patel

Date reported: 03/27/2023

Program name: Student management system

Release number: null

Version identifier: newest version

Configuration: default

Report type: design issue

Can reproduce: yes

Severity: Medium

Priority: high

Problem summary: Duplicate Admin Records Created and doesnt show error.

How to reproduce it: Steps to Reproduce:

1. Open the page for creating a new admin record.
2. Enter the admin personal and academic information.
3. Click on the save button to create the new record.
4. Repeat steps 1-3 for the same student to check.

Suggested fix: Add extra code to verify the admin doesnt already exist, then add it to the database.

**problem report number: 2**

Reported by: Dave Patel

Date reported: 03/27/2023

Program name: Student management system

Release number: null

Version identifier: newest version

Configuration: default

Report type: design issue

Can reproduce: yes

Severity: High

Priority: High

Problem summary: Login Page Not Loading

How to reproduce it: Steps to Reproduce:

1. Attempt to access the login page for the admin information database.
2. Wait for the page to load.

Suggested fix: Verify the code is correct and then refresh the entire database. Try debugging it.
