

ITERATION 2:

Group 12 Log File:

Meeting	Meeting Time
Zoom meeting #1	45 Min
Meeting at Lassonde bergeron#1	1 Hour
Lecture meeting #1	2 Hours
Zoom meeting #2	30 Min
Discord Meeting#1	1 Hour
Discord Meeting#2	20 Min
Private Calls among team members#1	40 Min
Lecture meeting #2	2 Hours
Zoom meeting #3	2 and half hours

Rationale behind changes on plan and big design decisions

We removed the elective courses and general knowledge courses that we decided to do in iteration 0. This is due to the customer's priority request for other important functions that needed to be done first. We will complete this task near the end as per the customer's request, as it is a low priority for now. Another big change was, we made the database do the job of the backend components when we connected the database and java.

Any concerns with the project or group members

No concerns with the group members. No concerns with the project as the implementation was done successfully.

Task assignments to each member

Database: Matthew, Bruce, Viral

Backend: Viral, Dave, Bruce, Wu

Frontend(UI): Wu

Test Cases: Viral, Dave

The development tasks per user story for iteration 2

EECS department able to edit course taken:

Now the university department can edit the course taken as well as they have access to the database and will be able to remove or add student courses.

Allow Academic Advisor to edit course taken:

Added the methods to add and drop to the database and to verify it we have prepared some test cases for that. We connected the database (DB) to backend classes. The courses can be added or removed from the student table in our database with the implementation of the methods.

Admin information database:

Make some changes to the Admin login part for UI. This helps the admin manage all the university members' information which includes login, record, and personal information.

This development stage

Development Tasks	Allocated Time	Actual Time Taken
Admin Database	1 week	4 days
Allow academic to edit course taken	1 week	5 days
Test Cases	4 days	4 days
Documentation	2 day	1 day
